My role in the project	Erasmus coordinator
Planned duration of the cooperation	2,5 months (10 weeks)

LOOKING for a partner from

The following countries	EU countries
Disciplines / Academic fields	Research centres on the field of geo-economics

COMMENTS

We are School centre Ptuj from Slovenia. School centre Ptuj consists of 5 independent pedagogical schools which focus on the following subjects: economics, agriculture, vocational and technical schools for electrical engineering and mechanical engineering and higher vocational college. Students on higher vocational college have a possibility to study on four different areas: economics, agriculture, mechatronics and bionics.

We would like to find partners from EU countries for student's placement mobility on the area of economics - especially geo-economics. We have one student (Zoran Nedog) who wants to carry out obligatory practice in a research centre, where economy and international

relations among countries are combined together. He speaks good English. He is studying in two faculties. One is Higher vocational college (our school) – branch of economy and the other is Faculty of Criminal Justice and Security. His wish is to carry out the obligatory practice and through this practice he wishes to prepare his diploma paper on the subject risks in international business.

We would be very pleased, if you would be interested in taking a student from our country. The obligatory practice will take place from the beginning of January till middle of March (10 weeks) 2014. Our student is very enthusiastic in doing practice abroad. The student will do the practice through Erasmus programme.

Please let me know if you are interested and if there is further cooperation possible. I can send you more information about our student and all other information that you would need. Even if your answer will be negative, please let me know. My e-mail: andreja.drevensek@scptuj.si

Hope to hear from you soon and thank you for your time!

Best regards,

Andreja Drevenšek
